

KMC 12HD

Superior Image Performance

Optimized COMED algorithm brings
excellent quality image even with low
levels of radiation

KMC 12HD

MOBILE SURGICAL FLUOROSCOPIC X-RAY SYSTEM

Improved Image Quality

Excellent coverage with wide flat-panel

Large FOV frees from geometrical restrictions and supports broad range of applications

The best quality image via Smart Algorithm

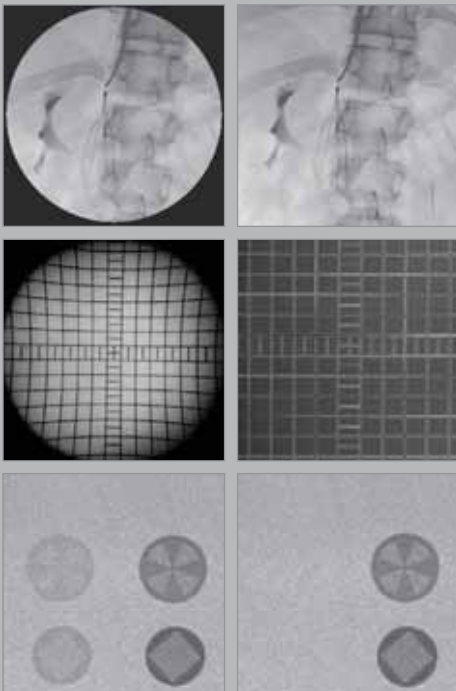

Abundant and Multilevel gradient

16-bit dynamic range view

Wide 16-bit dynamic range ensures clear rendering of subtle shading in images

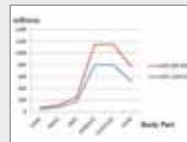

High-speed frame rate

Cardiovascular imaging with no afterimage even at the 60 frames / sec setting

Optimized COMED algorithm brings excellent quality image even with low levels of radiation

Significantly Bring Down the Dosage

High quality imaging is obtained even when the radiation exposure to both patients and operators is significantly lowered.

User Friendly Interface

Quick system navigation with touch screen
Simple & convenient interface

Advanced footswitch operability
Ergonomic design for less fatigue build-up
Highly used functions are memorized

Rotary operating panel
Comfortable controlling with 270° operating panel

Premium cart
Built-in automatic adjustment in a view-cart for operators' convenience
